PROFILE

Detail-oriented QA Engineer with 2+ proven experience ensuring software quality across diverse projects. Skilled in designing and executing comprehensive test plans, identifying and resolving defects, and driving process improvements to enhance product reliability. Adept at collaborating with developers, product managers, and cross-functional teams to integrate quality at every stage of the SDLC. Recognized for strong analytical and problem-solving skills, clear communication, and the ability to manage multiple priorities under tight deadlines. Committed to continuous improvement and delivering exceptional user experiences through rigorous testing and quality assurance practices.

PROFESSIONAL EXPERIENCE

Software Quality Assurance Engineer   *09/2024 - Present*
CureMD Pakistan Private Limited

• **Acquired good experience in the EHR (Electronic Health Records),** working on complex, domain-specific applications.
• **Led and managed a team as a QA Lead**, successfully delivering 80-85% of projects on time, while earning 100% client satisfaction and appreciation for high-quality deliverables.
• **Worked across multiple projects involving complex API integrations,** ensuring seamless data exchange and system interoperability.
• **Actively participated in routine scrum ceremonies such as daily stand-ups,** grooming, and planning sessions, consistently raising valuable insights and points that enhanced team performance.
• **Collaborated closely with analysis, client services, and configuration teams,** ensuring streamlined communication and smooth project execution.
• **Thoroughly evaluated and tested software to validate program functions**, ensuring alignment with business requirements and technical specifications.
• **Performed comprehensive Regression and Integration Testing**, identifying critical issues early and ensuring software stability before major releases.
• **Audited detailed WBS and Test Planning,** while guiding Scrum QA members on best practices and quality standards.
• **Introduced process improvements in defect tracking and reporting**, which reduced resolution time and improved collaboration between QA and development teams.
• Supported product managers and development teams across all phases of testing, from planning and execution to troubleshooting and reporting, ensuring a smooth and efficient development cycle.

Associate Software Quality Assurance Engineer   *09/2023 – 09/2024*
CureMD Pakistan Private Limited

• **Worked extensively on EHR (Electronic Health Record) applications**, ensuring compliance with industry standards and seamless functionality.
• **Led corrective and preventive actions to effectively drive project closure**, mitigating risks and enhancing overall product quality.
• **Performed extensive testing methodologies** including Blackbox Testing, Navigation Testing, and Validation Testing and Integration Testing.
• **Collaborated proactively with developers and business analysts to assess program capabilities** and align testing demands with project goals, ensuring efficient and thorough quality assurance processes.
• **Thoroughly evaluated and tested software systems to validate program functions,** ensuring that the final product met high-quality standards and customer expectations.
