📍 House no 8-S-3B, Qaisar Street, Shah Kamal Colony, Lahore  Ahsan Hanif

PROFILE

Detail-oriented Software Quality Assurance Engineer with 3 years of experience in manual and API testing across complex, domain-specific EHR applications. Experienced in test planning, test case design and review, functional, regression, integration, usability, validation and backend testing, defect lifecycle management, release planning, deployment verification, and Agile/Scrum delivery. Proficient with Azure DevOps and Postman, with working knowledge of SQL and exposure to Selenium WebDriver and Python. Proven ability to collaborate with developers, product managers, business analysts and cross-functional teams, improve QA processes, and support high-quality releases.

PROFESSIONAL EXPERIENCE

Senior SQA Engineer

CureMD Pakistan Private Limited

09/2025 - Present

- **Lead QA activities across complex EHR applications**, driving quality from requirement analysis and test planning through execution, release readiness and deployment verification.
- **Design, review and execute comprehensive test cases and test plans** covering functional, regression, integration, usability, validation, navigation and business-functionality scenarios.
- **Collaborate closely with developers, product managers, business analysts and client services** to clarify requirements, identify risks and resolve quality issues throughout the SDLC.
- Audited WBS and QA test planning while guiding Scrum QA members on testing scope, prioritization and quality standards.
- **Manage test environments and test data** to support reliable execution of functional, integration and regression scenarios.
- **Participate in sprint planning, backlog refinement, daily stand-ups**, sprint reviews, story/task estimation and release planning within an Agile/Scrum environment.
- **Developed a standardized production-readiness scoring framework** across seven quality dimensions with defined verdict thresholds, enabling consistent and objective release sign-off.
- **Mentor junior QA engineers** on test design, defect lifecycle management, QA standards and effective testing practices.
- **Streamlined QA reporting by standardizing templates** and automating recurring data-tracking activities, reducing manual effort in status reporting.

SQA Engineer

CureMD Pakistan Private Limited

09/2024 – 08/2025

- **Performed comprehensive functional, regression and integration testing** of EHR applications, identifying critical issues early and supporting stable production releases.
- **Created and reviewed test plans and detailed test cases** based on business requirements, technical specifications, acceptance criteria and risk areas.
- **Conducted backend validation using SQL** and supported test-data preparation, verification and troubleshooting across application workflows.
- **Participated in release planning, deployment verification and post-deployment validation** to ensure production readiness.
- **Manage defects through Azure DevOps**, including defect creation, prioritization, lifecycle tracking, retesting and communication with development teams.
- **Worked closely with product managers and development teams** from planning and execution through troubleshooting, defect resolution and release reporting.

- **Tested EHR applications** to validate business functionality, usability, navigation and compliance with defined requirements and quality standards.
- **Performed Business Functionality, Black-box, Navigation and Validation Testing** across application workflows.
- **Created and executed test cases, prepared test data** and collaborated with developers and business analysts to investigate and resolve defects.
- **Supported corrective and preventive actions** to mitigate risks, improve product quality and drive successful project closure.
- **Validated application behavior against business requirements and customer expectations** while documenting defects and verification results.

EDUCATION

Bachelors in Mechanical Engineering
University of Engineering and Technology, Lahore

10/2017-08/2021

TECHNICAL SKILLS

- **Testing:** Functional, Regression, Integration, API, Usability, GUI, Navigation, Validation, Black-box, Backend, Release/Deployment Verification
- **API:** Postman — intermediate experience with collections, environments, variables, authentication, assertions and API workflow validation
- **Automation:** Python — good working knowledge; Selenium WebDriver — hands-on exposure; currently strengthening automation skills
- **Performance:** JMeter — performance-testing concepts and test-case design
- **Defect / ALM:** Azure DevOps
- **Database:** SQL — Intermediate level expertise
- **Methodology:** Agile / Scrum — Sprint Planning, Refinement, Daily Stand-up, Sprint Review, Story/Task Estimation, Release Planning
