EDUCATION

National University of Sciences and Technology (NUST)

Bachelor of Software Engineering

Islamabad, Pakistan

Sep 2022 – June 2026

EXPERIENCE

Junior Software Engineer

Mar 2026 – Present

BenchMatrix Pvt. Ltd. (Remote)

Karachi, Pakistan

- Developed a configurable Risk Assessment module for Anti-Money Laundering(AML) software, implementing dynamic scoring algorithms based on client-defined rules and regulatory parameters
- Designed and implemented MySQL database schemas derived from Business Configuration Documents (BCD)
- Integrated rule engines, workflows, and data mappings for multi-tenant AML deployments
- Handled thread concurrency and optimized bulk request processing for high-volume operations
- Implemented performance and load testing using k6, simulating concurrent users to validate system scalability

Front-End Developer

Jan 2025 – Dec 2025

Oryns Solutions Pvt. Ltd.

Islamabad, Pakistan

- Led frontend development of **DeliveryOS** (Sender, Rider, Receiver apps) using React Native and Expo
- Delivered complete production UI within a 2-week deadline and optimized development workflows
- Implemented real-time delivery flows including Maps integration, rider matching, live tracking, and wallet systems
- Architected scalable state management using Zustand and TanStack React Query across multi-app architecture
- Developed **Unify** mentorship app using Expo Router, and MobX State Tree for complex state handling
- Built responsive, high-performance UI using Tailwind CSS and Reanimated for smooth cross-platform UX

Machine Learning Intern

Aug 2024 – Sep 2024

Machviz Pvt. Ltd.

Islamabad, Pakistan

- Worked on cancer cell segmentation and classification using deep learning techniques
- Implemented object detection models using YOLOv8 for accurate identification of cancerous cells
- Preprocessed medical imaging data and improved model performance through training and evaluation

PROJECTS

MERN E-commerce Website | *MongoDB, Express, React, Node.js, Redux, MUI*

2024

- Built a fully functional E-commerce platform with authentication, product filtering, cart, and admin dashboard
- Used Redux Toolkit for state management and integrated REST APIs for backend functionality
- Designed responsive UI using Material UI and custom React components

DeliveryOS | *React Native, TypeScript, Expo, Zustand, React Query*

2025

- Developed the DeliveryOS for a food-delivery-style platform comprising three apps (Sender, Rider, Receiver), enabling parcel booking, real-time rider matching, and live order tracking
- Implemented multi-step delivery flows with Google Maps integration, price negotiation, wallet management, and real-time order state transitions
- Architected a scalable, shared tech stack across all apps using Zustand, TanStack React Query, secure authentication, and animated UI with NativeWind and Reanimated

Unify — Mentorship Collaboration App | *React Native, Expo Router, MobX, Tailwind CSS*

2024

- Developed a mobile-first collaboration platform focused on streamlined interaction between students and mentors
- Implemented screen navigation using Expo Router and managed complex reactive state with MobX State Tree
- Designed custom UI components using Tailwind CSS with iconsax-react-native for a modern, responsive experience

Fintech Clone Mobile App | *React Native, Expo, Skia, Clerk, Zustand*

2024

- Developed a high-fidelity clone of a modern fintech app, including secure login and animated charts
- Used @clerk/clerk-expo for authentication and @shopify/react-native-skia for visual components
- Managed state and API caching using Zustand and React Query

Portfolio Website | *React, CSS, Responsive Design*

2024

- Created a clean, modern portfolio to showcase development work and skills
- Built with React and CSS; mobile responsive and hosted on GitHub Pages
- Deployed at: [portfolio-website.vercel](https://portfolio-website.vercel.com)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, C/C++, HTML/CSS, SQL, JSON

Frameworks: React, React Native, Node.js, Express, Expo, Tailwind CSS, Redux Toolkit, Next.js

Developer Tools: Git, GitHub, VS Code, Postman, Figma

Databases: MongoDB, SQL

Others: REST APIs, JWT Auth, Responsive Design, Agile Development
